

FAQ

Q: Will My Vinyl Fence Fade?

A: Any product exposed to UV light will uniformly and gradually shift in color over time. It is expected that your vinyl fence will do the same. The overall changes should be minor and meet the industry standards established. Anything to the contrary is covered in the warranty.

Q: Will My Vinyl Fence Chalk?

A: All pigmented materials that are constantly exposed to the sunlight and elements will experience chalking over time. If your vinyl fence experiences this, clean off with soapy water.

Q: Is It OK to Paint My Vinyl Fence?

A: No, it is not acceptable to paint your vinyl fence. This will void the warranty.

Q: How Will My Vinyl Fence Perform in Hot and Cold Weather Conditions?

A: Like any exterior PVC based building product, vinyl fence will absorb heat and cold, and expand and contract as temperatures change. It is normal for the fence to be more stiff and rigid when cold and more flexible when hot. The fence is engineered to withstand normal changes in temperature.
